Every business uses cloud services to store its customer information, run applications, manage operations, and perform its daily activities. While cloud computing brings flexibility, speed, and cost savings, it also raises an important question about how the organization can protect personal data in cloud services.

With [ISO/IEC 27018 certification](#), the organization can keep the personal data safe in cloud environments and build trust with its customers and partners. This is a globally recognised standard that focuses on privacy protection in cloud environments, ensuring that personal data is handled securely and ethically.

What is ISO/IEC 27018?

ISO 27018 is an international standard that focuses on protecting personal data in cloud computing. It provides guidelines that keep customers' personal information safe, secure, and well-managed. This standard is built on the ISO/IEC 27001 framework and adds specific controls for handling Personally Identifiable Information (PII) in public cloud environments.

Key Principles of ISO/IEC 27018

Transparency - Organizations must be clear about how they collect, store, and use personal information.

Data Control - Customers should have control over their personal data and be able to access that data and remove it whenever needed.

Data Security - Strong security measures must be used to protect data from cyber-attacks, misuse, or loss.

Accountability - Businesses must prove that they follow proper privacy rules and keep records of their actions.

User Rights - Individuals have the right to know how their data is handled

Benefits of ISO/IEC 27018 Certification

- Protects personal data
- Builds customer trust and reputation
- Follow the national and international rules and regulations
- Reduces risks of data breaches
- Ensures transparent data handling
- Provides a competitive advantage
- Strengthens the overall security system
- Improves customer relationships

Industries That Benefit From This Certification

Any business that stores or processes personal data in the cloud can benefit from this certification

- Cloud service providers
- IT and software companies
- E-commerce platforms
- Healthcare organizations
- Finance and banking
- Startups handling personal data

Why Choose Us?

If you are looking for an ISO Certification that helps you to protect your information in the cloud system. Then you are in the right place, SQC Certification provides various ISO Standards for quality, safety, security, and efficiency. Our approach ensures that your organization meets all the requirements of the ISO Standard, which improves the organization's performance, efficiency, and customers' trust.
